IT - Molti clienti hanno la necessità di stabilizzare la pompa durante il funzionamento. Abbiamo quindi realizzato la **staffa antiribaltamento**, grazie alla quale la pompa mantiene la sua posizione senza rovesciarsi in avanti oppure di lato, mentre l'operatore può lavorare senza occuparsene. La staffa è utilizzabile su tutti i modelli di elettropompe ad esclusione di quelle con motore da 3.0 HP.

La staffa viene fornita completa di viti e bulloni per il fissaggio della pompa; è munita di piedini in gomma per rimanere stabilmente in posizione.

La pompa rimane sempre trasportabile grazie alla maniglia di serie.

GB - Many customers have the need to stabilize the pump during operation. We have therefore realized the **anti-tip bracket**, thanks to which the pump maintains its position without spilling forward or to the side, while the operator can work without deal. The bracket is used on all the models of electric pumps except those with from 3.0 HP motor.

The bracket is provided with screws and bolts for fixing the pump; is provided with rubber feet to remain firmly in position.

Is it still possible to carry the pump thanks to the handle.
